

Solution Brief

Insight Security Services

Mitigate risk and protect your organisation

With the rapid growth in endpoints, data volumes, cloud, and the overall complexity of the data centre, security isn't easy. Organisations have to evaluate the amount of protection they need based on their environment, budget, and the level of risk they can safely assume.

Simply wanting as much security as possible is understandable — but unrealistic.

An advanced approach

When you design your security program, you begin with policy. Various policies address the cloud, the data centre, endpoints, mobile use, and the network. Point products are acquired to support each area. The result, however, is often an unintegrated patchwork without a holistic and encompassing strategy.

Cyber Security Landscape				
ENDPOINT The devices you use to do your job	APPLICATION The software you buy or build to run your organisation	CLOUD Where you put those applications	NETWORK, DATA CENTRE & IOT Where you put those applications	DATA CENTRIC The information supporting your organisation
Governance, Risk & Compliance				
Identity & Access				
Threat Detection & Response				
Human Factors				

Insight has a robust security practice and the pulse on the IT security landscape. We have helped organisations secure their data and networks for more than 30 years. As a group of advisors, solution providers, and technical specialists, we maintain certification and immersion in the latest security technologies and best practices. Our Security Services consultants can help you consider the security implications of your business activities and adopt solutions aligned with your needs and objectives. We begin by assessing your current environment, challenges, and requirements.

Why Insight

1000+ EMEA based services teammates including consultants and engineers

168+ security products and software offered through Insight

A certified & award-winning partner of major security solution vendors

Certified for ISO 27001

Vast reach with operations in 11 countries serving clients across Europe

Common challenges

- Multiple security solutions that don't integrate and drain IT resources.
- Unclear or incomplete data strategies that don't address data privacy regulations.
- Staff or knowledge gaps that result in security vulnerabilities.
- Wanting to adopt new technologies, platforms, or data-intensive models while taking the proper security measures.
- Preparing for or recovering from a security event.
- Securing buy-in from leadership to invest in more security infrastructure.

Our premise

- Technology alone will not fix problems; poorly implemented technology makes things worse.
- A comprehensive governance model with a clear vision can go toward better security.
- Security and the IT organisation can be business enablers.
- Data is valuable — it is also a risk. Make data decisions wisely.

Solutions portfolio

Security Assessments	Security Plan and Design	Security Build and Implement	Security Operations Management
<ul style="list-style-type: none"> • Penetration Testing • M365 Security Mini-Audit • M365 Security Assessment • ISO27001 Gap Analysis • Cyber Essentials / Cyber Essentials + • Security Posture Assessment 	<ul style="list-style-type: none"> • Virtual CISO • Business Continuity Discovery • ISO27001 Gap Analysis • Discover Sensitive Data • Manage and Investigate Risk • Securing Identities • Threat Protection • Hybrid Cloud Security 	<ul style="list-style-type: none"> • Microsoft Sentinel Quickstart • Cisco Duo • Cisco Umbrella Cloud Security 	<ul style="list-style-type: none"> • Managed End-user Security Awareness • Insight Security Configuration Maintenance Service • Microsoft Sentinel managed service

Business outcomes

		
<p>Reduce cyber risks that leads to loss of customer confidence and market share</p>	<p>Drive real productivity with a secure cloud and mobile environment</p>	<p>Create a robust security strategy and avoid shadow IT</p>

Meaningful solutions driving business outcomes

We help our clients modernise and secure critical platforms to transform IT. We believe data is a key driver, hybrid models are accelerators, and secure networks need to be well integrated. Our end-to-end services empower companies to effectively leverage technology solutions to overcome challenges, support growth and innovation, reduce risk, and transform the business.

Why Insight?

Insight has a wealth of experience in successfully migrating clients from traditional infrastructures to modern software-defined, cloud-connected networks. Today, technology isn't just supporting the business; it's becoming the business. At Insight, we help you navigate complex challenges to develop new solutions and processes. We will help you manage today's priorities and prepare for tomorrow's needs.
